

DIRECTIONS FOR USE

LUCASOL™ Mix Tank 2.5 U.S. Gallons

3 ways to mix LUCASOL™ gallons:

- Use 5 oz. of LUCASOL™ One Step™ deodorizing disinfectant cleaner and add water to the top line of tank.
- Use the LUCASOL™ measuring cup and add water to the top line of tank.
- Use 40 pumps from the LUCASOL™ measuring pump and add water to the top line of tank.

Great for larger salons!

LUCASOL™ 24 oz. Xtra-Life Trigger Sprayer

- Use 3 pumps from the LUCASOL™ measuring pump, then add water to fill line.

Chemical resistant piston bushing and over-size piston provides a longer life without leaks. Xtra-Life Trigger Sprayer outlasts 4 discount sprayers!

LUCASOL™ Eyeshield Soak Tank

2 ways to mix LUCASOL™ for soak tanks:

- Mix LUCASOL™ in mix tank or Xtra-Life Trigger Sprayer according to directions. Use solution to fill soak tank to fill line.
- Use 3 pumps from the LUCASOL™ Measuring Pump, then add water to fill line.

LUCASOL™ 1/8 oz. Measuring Pump

- Measuring pumps fit concentrate bottles (please specify quart or gallon). Each pump dispenses 1/8 oz. of liquid concentrate per pump. Use three pumps of LUCASOL™ One Step™ deodorizing disinfectant cleaner to yield 24 oz.

Pump arrives compressed. Pull up and twist top to prepare for use.

General information: Mixing ratio is 2 oz. per gallon of water. Please use appropriate measuring device (i.e. measuring LPC measuring cup or pump). Bottle cap is not to be used to measure. Read and follow all directions on concentrate bottle. Handle concentrate with care.
